National Fluoridation News
April 1963 to 1988
Available for \$14.00 (\$3.00 postage) from:
PO Box 1611, San Anselmo, CA 94960, USA

This is a guide to some of the evidence about fluoride poisoning, for anyone who has not heard of it before, or who might be contemplating giving fluoride to people in some way.

The subjects are arranged alphabetically. (The word "fluoride", articles and conjunctions are ignored for alphabetical sorting purposes).

The guide covers 12 books and one periodical on fluoride and fluoridation, listed at the back.

Each section contains pointers to what each has to say (if anything) on the particular subject. The book page numbers are shown at the left margin. The books are dealt with in order of publication. This is followed by a second chronological list, containing the relevant issues of National Fluoridation News. Finally come any further items you may like to see.

Numbers in parentheses alongside a National Fluoridation News entry refer to the number of items on the subject in that issue. Authors of entries in National Fluoridation News are also sometimes added in parentheses, to clarify the portion of the issue in which the relevant material appears.

An item on fluoride air pollution in Australia would appear both under FLUORIDE AIR POLLUTION and under AUSTRALIA, and so forth, enabling full treatment of each subject from its own section.

Some countries have their own section; Australia, Canada, Finland/Denmark together, Germany/Austria together, The Netherlands, New Zealand, Norway and Sweden. Evidence from other countries can be sought by reference to THE COUNTRY GUIDE. But all the evidence listed by country also appears under one or more of the non-geographic titles.

Items not categorisable solely or at all under other headings are included in the MISCELLANEOUS DENTAL AND STOMATOLOGICAL and MISCELLANEOUS NON-DENTAL sections.

The fluoride poisoning evidence is therefore now available in an organised way. Whether you are a member of the public trying to publicise the pollution evidence or an official expert pretending you have read it, you will find it much easier to cope using these ready-made notes.

I hope you will find them useful.
