

Fluoridation and Truth Decay pages:

- 24 "lowers hemoglobin and red cells through interference with iron-protein metabolism and may cause irreversible loss of potassium from the red cells"  
69 human cell growth rate depressed (in culture)  
77 1943 JAMA warning against water containing 1 ppm  
241-2 film demonstration of fluoride's effects on cells  
244 cell changes found in acute fluoride poisoning comparable to those seen in high-grade anoxia  
247 impairment of an important step in cellular metabolism  
252 NaF therapy alters bone cell function

Fluoridation \ The Great Dilemma pages

- 25-6 phagocytosis  
210 oocytes  
225 giant monocyteoid cells suggestive of reticuloendothelial malignancy

Fluoride \ The Aging Factor pages:

- 57 testis, chromosome damage

Fluoride in Australia \ A Case to Answer pages:

- 27 more research needed after Tsutsui 1984 experiment  
131 Oxford cytological study "interesting" but "irrelevant" — NHMRC

THE FLUORIDE INFORMATION SERVICE

Page 2 of 2 on: CYTOLOGY

Fluoride \ The Freedom Fight pages:

98	cholinesterase
105	cholinesterase, acetylcholine
157-158	cholinesterase
166-167	cholinesterase
167	cholinesterase and cell permeability
