

209-210            death of lamp worker and beryllium fluoride

160	[missing]
170	bronchitis, emphysema, asthma

```
106             fluoride content of cow lungs
107             fluoride content of lungs of guinea pig, dog
```

24 anoxia in the newborn — survival shortened  
69 fluoride more potent than cyanide as an  
inhibitor of respiration  
111-2 fluoroalkane aerosol propellants and cardiac toxicity  
112 rise in death among asthmatics  
113 rise in death among asthmatics  
113 reports show aerosol nebulizers made asthma worse  
127 children born with asthma near  
Rocky Mountain Phosphate Company  
127 respiratory disease in adults near  
Rocky Mountain Phosphate Company  
129 eye irritation, sneezing and nosebleeds near  
Polk County, Florida, phosphate plants  
130-2 Barci v Intalco lawsuit over fluoride damage to  
crops, livestock and human health from aluminium plant

165 neighbourhood fluorosis, accumulation and  
musculo-skeletal, gastrointestinal and  
respiratory symptoms

165 complete retention of airborne fluoride in lung

165 lungs absorb gaseous and particulate fluorides equally

165 46% with active TB near Russian aluminium plant

166 children near superphosphate plant had  
higher respiratory and TB frequency

166 psychological and respiratory effects near  
phosphate plant

166 pre-skeletal fluorosis including  
neurological, respiratory and gastrointestinal symptoms  
near Canada, Michigan and Iowa fertilizer plants

196 X-rays show higher incidence of respiratory ailments  
and TB in children near Soviet superphosphate plant

247-8 fluorides and calcium

248 respiratory failure in fluoride poisoning

271 aerosol and positive sputum pap tests

271-2 aerosol deodorants and lung damage

272 routine use of aerosols may be factor in lung cancer

278 urticaria, exfoliative dermatitis, atopic dermatitis,  
stomatitis, gastro-intestinal and respiratory allergy in  
seven toothpaste/vitamin preparation allergy victims

111 elevated lung cancer mortality near Ontario steel mills  
synergism between fluoride and beryllium, asbestos

Environmental Fluoride 1977 pages:

- 83 fluoride intake among aluminium potroom workers
- 84 co-carcinogenic role of fluorspar in miners  
problem of variables in assessing  
possible carcinogenicity
- 86 respiratory ailments from occupational exposure  
immediate upper respiratory irritation among  
silver brazers  
intravenous radiofluoride highest in the lungs in  
analyses of soft tissues of experimental rats  
rhinitis in potroom workers
- 86-87 rhinopharyngolaryngitis
- 87 etiology, pathogenesis and prophylaxis of  
87 atrophic rhinitis in swine  
USSR limit for workplace airborne  $F^-$  0.5 mg/m<sup>3</sup>  
increased sensitivity to light in USSR workers at  
0.5 mg/m<sup>3</sup> limit  
toxic symptoms in USSR workers at 0.5 mg/m<sup>3</sup> limit
- 87 increased skeletal incorporation of fluoride in  
USSR workers at 0.5 mg/m<sup>3</sup> limit  
proposed limit of 0.1 mg/m<sup>3</sup>  
occupational concentrations of  
0.22 mg/m<sup>3</sup> deleterious to health
- 109 inhaled fluoride
- 110-111 recommendations of NAS report  
on research for the future;
- 110 on health effects of airborne fluoride

Fluoridation \ The Great Dilemma pages:

152            highest reported fluoride concentration in lung  
220-1        elevated lung cancer mortality in fluorspar miners  
221    elevated cancer mortality in aluminium pot room workers  
          elevated lung cancer mortality near Ontario steel mills  
                  elevated lung cancer mortality near  
                          Scottish steel foundry

Fluoridation 1979:

Scientific Criticisms and Fluoride Dangers pages:

123                    absorption of fluoride from the atmosphere

Fluoride \ The Aging Factor pages:

6                    shallow breathing in allergic reaction  
10                    neighbourhood fluorosis  
          obstructive pulmonary changes in aluminium workers  
                  decreased elasticity of the lungs  
                  fluoride induced pulmonary fibrosis  
31                    disruption of collagen synthesis in lung  
45                    dyspnoea in skeletal fluorosis  
52                    excessive lung collagen in scleroderma  
74                    fluoride concentration in lung

43                      contribution of cigarette smoking to  
                             atmospheric fluoride pollution

45            chronic lung disease in four of fourteen workers  
                 at Bell Bay Comalco aluminium smelter, Tasmania

45                      acute dyspnoea in most workers at  
                 Bell Bay Comalco aluminium smelter, Tasmania
